

Symeres is one of the leading chemistry CROs in Europe, with over 500 scientists at six locations (Nijmegen, Weert, and Groningen in the Netherlands; Prague in the Czech Republic; Oulu in Finland; and Södertälje in Sweden). We provide a range of services to support small-molecule drug discovery and development projects for biopharmaceutical companies in the USA, Europe, and Japan. Our key areas of expertise are synthetic chemistry, medicinal chemistry, parallel chemistry, and chemical process R&D for clinical trials.

As part of an increasing demand for our services at our location in Weert (NL), we are currently looking for an

Information Systems Analyst (M/F) Full time

Together with a colleague you will be:

- Coordinating maintenance and requalification operations of laboratory equipment in accordance with the preventive maintenance program, as well as maintaining/improving laboratory equipment documentation.
- Providing support for the testing of new and existing software applications under development or consideration for purchase (e.g., design qualifications, software installations).
- Writing user requirement specifications for new laboratory equipment and systems.
- Liaising with relevant departments to support the execution of calibrations and/or qualifications.
- Authoring validation and/or qualification protocols to ensure compliance with CSV methodologies, data integrity, and procedures.
- Writing/reviewing procedures and working instructions related to the use and/or administration of laboratory instruments and/or systems.

Qualifications

- Bachelor's degree in chemistry, computer science, or a related field.
- A minimum of 2 years' working experience in laboratory equipment qualification.
- High level of initiative and flexibility.
- Proficiency with Microsoft Office (Word, Excel, PowerPoint) required.
- Working knowledge of cGMP in a pharmaceutical or regulated environment preferred.
- Working knowledge of laboratory systems/instruments and software applications (Empower, OpenLAB) preferred.
- Knowledge on data integrity guidelines preferred.

Job offer

An exciting position in a dynamic organization with an attractive remuneration package and opportunities for learning and development.
