

Symeres is one of the leading chemistry CROs in Europe, with over 500 scientists at six locations (Nijmegen, Weert, and Groningen in the Netherlands; Prague in the Czech Republic; Oulu in Finland; and Södertälje in Sweden). We provide a range of services to support small-molecule drug discovery and development projects for biopharmaceutical companies in the USA, Europe, and Japan. Our key areas of expertise are synthetic chemistry, medicinal chemistry, parallel chemistry, and chemical process R&D for clinical trials.

As part of the increasing demand for our services at our location in Weert (NL), we are currently looking for a skilled and enthusiastic

Analytical Project Leader

Full-time

The Analytical Project Leader (APL) is responsible for the direction of developmental aspects of projects with a focus on analytics (both R&D and production) during the period that the project is assigned to them. Within the project team, the APL is responsible for safeguarding the timely development of the necessary analytical package (sampling plans, specifications, method of analysis, protocols, and reports) to support the development of the process route and to support pilot-plant campaigns that are appropriate for the cGMP status of the project. The APL is also responsible for managing the aftercare activities related to the project, like customer inquiries, troubleshooting, and stability investigations. The APL gives proactive input for the continuous improvement of work processes and participates actively in strategic decisions in the interest of the department. Depending on the level of experience, the APL is expected to be capable of leading a larger number of and/or more complex projects.

Together with the Chemical Project Leader and the Project Manager, the APL forms the core team of the consigned projects. The APL is the direct line manager of the analysts in the team and reports to the Director of Development.

Qualifications

- HBO +/-WO level.
- Minimum of 3 years' experience in an analytical chemistry industrial work environment, of which at least 1 year in a similar job.
- Skill and ability to assess, plan, manage, and evaluate the analytical aspects of projects.
- Skill and ability to lead a group of <10 people.
- Global insight into the organization. Insight into the planning of projects and into the work of the analytical project teams.

Application
