Symeres is one of the leading chemistry CROs in Europe, with over 500 scientists at six locations (Nijmegen, Weert, & Groningen in the Netherlands; Prague in the Czech Republic; Oulu in Finland; and Södertälje in Sweden). We provide a range of services to support small-molecule drug discovery and development projects for biopharmaceutical companies in the USA, Europe, and Japan. Our key areas of expertise are synthetic chemistry, medicinal chemistry, parallel chemistry, and chemical process R&D for clinical trials. All these fields of expertise are supported by highly experienced and well-equipped analytical teams.

As part of increasing demand for services at our location in Groningen, we are currently looking for a skilled and enthusiastic

Process Research & Development Scientist
Full-time

Qualifications

For this position, we are looking for an enthusiastic, pleasant person who meets the following criteria:

- A BSc, MSc, or PhD degree in organic chemistry.
- Significant experience in developing chemical manufacturing processes.
- Experience in the pharmaceutical industry, in particular, early development of small molecules is an advantage.
- Profound knowledge of typical scale-up requirements.
- Creative, goal-oriented, and committed chemist who overcomes challenges.
- Accuracy and quality oriented.
- Good communication skills in English, both verbally and in writing.
- Works independently and has a collegial attitude.

Job offer

An exciting position in a dynamic organization with an attractive remuneration package and opportunities for learning and development.

Application
