

Symeres is one of the leading chemistry CROs in Europe, with over 500 scientists at six locations (Nijmegen, Weert, and Groningen in the Netherlands; Prague in the Czech Republic; Oulu in Finland; and Södertälje in Sweden). We provide a range of services to support small-molecule drug discovery and development projects for biopharmaceutical companies in the USA, Europe, and Japan. Our key areas of expertise are synthetic chemistry, medicinal chemistry, parallel chemistry, and chemical process R&D for clinical trials. All these fields of expertise are supported by highly experienced and well-equipped analytical teams.

As part of our increasing demand for our services at our location in Groningen, we are currently looking for a skilled and enthusiastic

Analytical Scientist

Full-time

You will work in a team of analytical chemists and use state-of-the-art equipment to develop analytical methods for small-molecule APIs and intermediates. With your excellent analytical chemist's instincts and knowledge, you will improve on analytical methods as the chemical reaction route is being developed. Together with the chemist(s), you will help to optimize the synthesis. You will investigate APIs in R&D stability studies, prepare related documentation and support project transfer to sites in Nijmegen, Weert and Prague. Furthermore, you will ensure optimum performance of the analytical equipment, as you will be involved in maintenance and troubleshooting.

Key job responsibilities

- Develop analytical methods for small-molecule APIs
- Improve on analytical methods as the chemical reaction route is being developed
- Help to optimize the synthesis with the chemist(s)
- Investigate APIs in R&D stability studies; prepare related documentation
- Support project transfer to other Symeres sites, such as Nijmegen, Weert, and Prague
- Be involved in maintenance and troubleshooting to ensure optimum performance of the analytical equipment

Qualifications

For this position, we are looking for an enthusiastic, pleasant person who meets the following criteria:

- BSc or MSc degree in analytical chemistry
- Hands-on experience with HPLC/UPLC, LC-MS, GC, and GC-MS techniques
- Practical experience in the pharmaceutical or a related industry is a prerequisite
- Experience in GMP and GLP protocols is an advantage
- Enthusiastic, self-organized, proactive, and result-oriented team player
- Excellent communication skills
- High level of written and spoken English is required

Job offer

An exciting position in a dynamic organization with an attractive remuneration package and opportunities for learning and development.

Application

Are you interested in this position? And do you meet the job requirements? Please send an email with your CV and motivation letter to our HR Manager, Marga Vos, by email: marga.vosensing@symeres.com. For substantive questions, please contact our Director Analytical Chemistry, Erik van Echten, at telephone number: +31 50 5757272. More information about the Symeres organization can be found on our website: www.symeres.com.
