Senior ADME Scientist

Admescope is a Contract Research Organisation, providing pre-clinical ADME-Tox research services for Biotech and Pharma companies globally.

Admescope is part of Symeres, a Dutch contract research and manufacturing organization, and together we offer integrated drug discovery services to our clients in the Europe and North America. As our business grows, we are further strengthening our scientific team.

We are hiring a Senior ADME Scientist with a strong experience in and understanding of ADME studies.

In the position you will be responsible for studies that we perform to our customers as a Study Director. In this role, you provide scientific support to our business development team members, plan the scientific and experimental content of the studies together with the customers, provide guidance and support to laboratory technicians and scientists, draw conclusions of the study and create final reports, and confirm the quality of the reports in your responsibility area.

You have a university degree in a suitable field of pharmaceutical sciences or chemistry, and a long experience and/or doctoral research in a field related to ADME research. Also experience in qPCR, LC/MS analytics and in vivo studies are considered as a benefit.

We offer an interesting, versatile and challenging position in a strongly growing company with a great atmosphere, and colleagues across our global organization. Furthermore, you will have an opportunity to be part of continuously evolving drug development landscape and interact directly with the customers in support of their programs. The position is available at our site in Oulu, Finland and it's possible to work remotely part-time.

The position will be filled in fall 2022.

Please send your application with salary request along with your CV, highlighting the relevant education and work experience to recruitment@admescope.com, with email subject line "ADME Scientist".
