

Symeres is the leading mid-sized transatlantic Contract Research Organization for drug-discovery and development challenges. With around 600 highly educated scientists in six locations in Europe and the US, we offer best-in-class solutions for drug discovery and drug development, from small to medium-sized molecule hits.

Our services span across early stage hit finding all the way to the delivery of early clinical drug substance API. We blend fast scientific knowledge with inventiveness to make great leaps on behalf of our clients. We Make Molecules Matter. Together.

To complement the team at our location in Weert, we are currently looking for a skilled and enthusiastic

System Administrator

Full-time

As System Administrator, you are accountable for driving results in a fast-paced environment by ensuring the stability of the in-house computer-server environment. This includes installing, configuring, maintaining, supporting, and optimizing all server-related hardware and software in a Microsoft Windows Active Directory multidomain environment. You will monitor the systems' performance and troubleshoot and resolve issues in a timely and accurate fashion to ensure high availability and performance of the systems.

Key job responsibilities

- Manage both physical and virtual Windows Server 2016, Windows 2019, and Windows 2022 operating systems.
- Install, upgrade, and configure hardware, including servers, storage systems, switches, and security appliances.
- Administer Active Directory, DNS, DHCP, IIS, Group Policy, and other Microsoft Windows services.
- Manage the VMware vCenter server and ESXi hosts and the VMware View virtual Desktop environment.
- Manage the Citrix XenApp environment for virtual application hosting.
- Identify security vulnerabilities and perform remediation.
- Work with the Systems Operations staff to develop local and remote network policies and assist with monitoring, updating, and configuring the network.
- Provide server/systems support, when appropriate, in addition to providing helpdesk and network/desktop support.
- Establish and maintain server documentation and procedures.

Qualifications

- Bachelor's degree in computer science or a related field required.
- 3+ years' experience in systems administration required.
- Microsoft, VMware, and CompTIA certifications desired.
- Strong experience with hands-on fixes at the server and desktop level, including installing and upgrading software, installing hardware, and configuring systems and applications.
- Strong knowledge of Windows PowerShell, Batch Scripting, Microsoft Windows operating systems, and Active Directory Services.
- Strong communication skills, both verbally and in writing. Fluent in English.
- Proficiency with Microsoft Office (Word, Excel, PowerPoint) required.

◊ Team player.

Job offer

An exciting position in a dynamic organization with an attractive remuneration package and opportunities for learning and development.

Application

Please send an email with your CV and motivation letter to our HR department (karen.storms@symeres.com). For questions about the vacancy, please contact Ruud Koolmees (ICT Manager) by phone: +31 24 372 33 00. More information about the Symeres organization can be found on our website: www.symeres.com.
