

Symeres is the leading mid-sized transatlantic Contract Research Organization for your drug-discovery and development challenges.

With over 600 highly educated scientists in five locations in Europe and two in the USA, we offer best-in-class solutions for drug discovery and drug development, from small- to medium-sized molecule hits. We are large enough to matter, and small enough to care.

Our services span across early stage hit finding all the way to the delivery of your early clinical drug substance API. Our key areas of expertise are synthetic chemistry, medicinal chemistry, parallel chemistry, and chemical process R&D for clinical trials. All these fields of expertise are supported by highly experienced and well-equipped analytical teams.

As part of our increasing demand for our services at our location in Nijmegen, we are currently looking for a skilled and enthusiastic

Analytical Chemist

Full-time

You will work in a team of skilled analytical chemists and use state-of-the-art equipment to develop analytical methods and purify challenging APIs and intermediates. You will advise synthetic chemists on how to analyze and purify their samples. One of your main tasks will be transferring methods from analytical to preparative systems and operating preparative HPLC and SFC equipment to support various projects in purifications and separations. Furthermore, you will ensure optimum performance of the equipment, as you will be involved in maintenance and troubleshooting. Apart from being trained in the role of separation specialist, you will also have access to all available analytical techniques in an excellently equipped laboratory. Together with the help of experienced colleagues, you will develop into a top-tier, versatile analytical chemist.

Key Job Responsibilities

- Develop analytical and purification methods for challenging APIs
- Mediate or advise synthetic chemists on how to analyze and purify their samples
- Be involved in maintenance and troubleshooting to ensure optimum performance of the analytical equipment
- Support the operation and management of the analytical laboratory

Qualifications

For this position, we are looking for an enthusiastic person who meets the following criteria:

- BSc degree in analytical chemistry
- Hands-on experience with HPLC (prep) chromatography
- Enthusiastic, self-organized, proactive, and result-oriented team player
- Excellent communication skills
- Written and spoken English required

Job Offer

An exciting position in a dynamic organization with an attractive remuneration package and opportunities for learning and development.

Application

Are you interested in this position? And do you meet the job requirements? Please send an email with your CV and motivation letter to our HR manager, Dries Sauren, by email: hrm.hrm@symeres.com. For substantive questions, please contact Jorg Benningshof at telephone number: +31 24 372 3300. More information about the Symeres organization can be found on our website: www.symeres.com.
