

Symeres is the leading mid-sized transatlantic contract research organization for drug discovery and development needs. With over 700 highly educated scientists and professionals in six locations in Europe and two in the USA, we offer best-in-class solutions for drug discovery and drug development, from small- to medium-sized molecule hits. We are large enough to matter, and small enough to care. Our services span across early stage hit finding all the way to the delivery of your early clinical drug substance API. Making molecules matter. Together.

For our Weert location, we are currently looking for a skilled and enthusiastic

PR&D Scientist

Full-time

In this role, you will

- Work as part of a project team on the development of safe and scalable synthetic routes for products, mainly in the early clinical development stage.
- Work closely together with the departments of analytical chemistry, solid-state chemistry, and manufacturing.
- Spend the majority of your time doing experimental work.
- Perform literature studies, write project updates and reports, present your results internally as well as to the client, and assist/supervise manufacturing campaigns in the kilogram lab and pilot plant.

Qualifications

- You hold an MSc degree or a university of applied sciences degree (HBO) in organic chemistry. Alternatively, you hold a PhD degree in organic chemistry.
- You are results driven with a proven track record with respect to small-molecule synthesis.
- Experience of process scale-up is a strong advantage.
- Understanding cGMP and regulatory requirements as they relate to laboratory practices is an advantage.
- Experience in the chemical or pharmaceutical industry is an advantage.
- Strong communication skills, both verbally and in writing. Fluent in English.
- You are pragmatic with a good working attitude, accurate, and a team player with an eye for detail, quality, and safety.

Job offer

An exciting position in a dynamic fast-growing organization with an attractive remuneration package and opportunities for learning and development.

Application
